

Improving Critical Care through OR Design

Advance
your workplace,

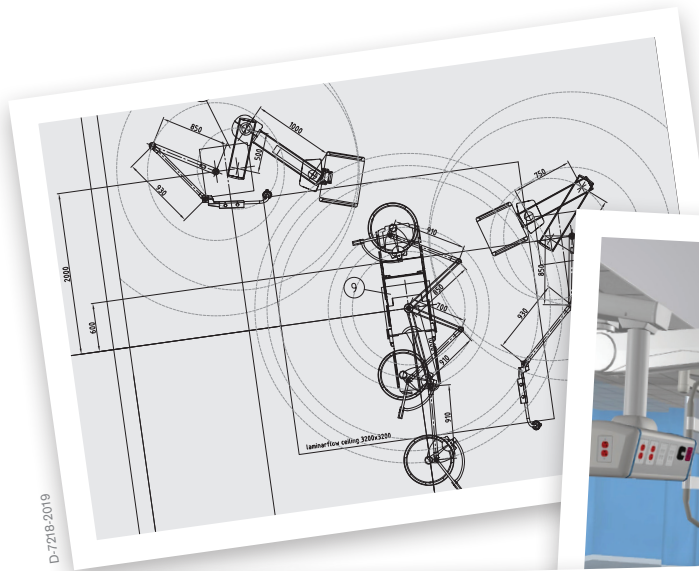

THINKING ABOUT UPDATING OR BUILDING A NEW OR?

help improve
your outcomes.

CHOOSE A SPECIALIST IN CRITICAL CARE

We start with **CARE-CENTERED WORKPLACES** for enhancing clinical workflows

Our patient-centered workplaces are built from the ground up to help your team perform at its best. By leveraging our extensive design experience and today's best practices, we can help you streamline workflows, optimize infection control, and adapt to future needs.

Fill them with
PROTECTIVE THERAPIES
to help improve clinical outcomes

We believe that OR technology should advance safety for the patient and efficiency for the OR team. Our technology brings ICU-quality ventilation to the OR, while our intuitive user interfaces offer consistency across critical care areas – helping to reduce the potential for error while keeping the patient connected throughout the whole surgical pathway.

Integrate them with
CONNECTED TECHNOLOGIES
for managing costs of care

Better decisions support better care – and better data management improves business results. Dräger connects essential technologies and brings data to both the point of care and the hospital information system.
