

Paladin Healthcare offers an education for your team to learn more about “What happens after the open house? - What can we do to manage clinical reality?” and “Mass Casualty – How to plan for the unknown”

Our Lunch & Learns can take place in your offices or in our brand new state of the art learning center in Oakland, FL (Orlando).

These courses are registered for 1 hour of continuing education credit each with the American Institute of Architects (AIA) and The Center for Health Design (EDAC).

Learning Objectives:

1. Identify and understand key issues of repetitive, unnecessary, and avoidable financial losses for healthcare facilities.
2. Understand how to develop, design, and provide a life-cycle cost reduction solution to clients.
3. Identify key areas that impact hospital reimbursement rates and provide a system to help them avoid penalties.
4. Provide end-users with the means to grow, change, and adapt to their future needs without compromising the integrity of the facility or your design intent.
5. Create solutions for Surge Population and Emergency Management.
